The following listing of claims will replace all prior versions and listings of claims in this application.

**Listing of Claims:**

Claim 1 (currently amended): A method of treating a disease associated with bone metastasis comprising administering to a patient with a disease associated with bone metastasis an effective amount of adenosine or a derivative thereof in combination with a bisphosphonate and at least one targeting agent to decrease the signs and symptoms of said disease, wherein said bisphosphonate is pamidronate and said targeting agent is samarium-153.

Claim 2 (currently amended): A method of treating a disease associated with bone metastasis comprising administering to a patient with a disease associated with bone metastasis an effective amount of adenosine or a derivative thereof in combination with a bisphosphonate, at least one targeting agent, and an agent which blocks adenosine receptors to decrease the signs and symptoms of said disease, wherein said bisphosphonate is pamidronate and said targeting agent is samarium-153.
